

# Port 093 – Canadian DCM

This beamline is PRT owned.

Updated June 2009

## Beamline

The Canadian Double  
Crystal Monochromator  
608-877-2093

## Manager

Narayana Appathurai  
608-877-2349  
[nappathurai@src.wisc.edu](mailto:nappathurai@src.wisc.edu)

FIG. 4. Beam line photon flux as a function of energy. (a) measured value while Aladdin is at 1.0 GeV, 100 mA, (b) calculated (SHADOW) value for Aladdin at 800 MeV, 100 mA, (c) measured value while Aladdin is at 800 MeV, 100 mA.

## Technical

<b>Energy Range</b>	1500 – 4000 eV
<b>Bandpass</b>	The minimum bandpass is $\Delta E \sim 1.0$ eV
<b>Focused Spot</b>	The spot position is 241 mm beyond exit flange. The spot size (horizontal x vertical) is 2 x 2 mm.
<b>Automation</b>	Computer controlled scanning
<b>Computer Interface</b>	RS 232 port
<b>Special Feature(s)</b>	InSb(111) and Quartz (1010) crystals available
